STAR READERS WARNED BY TRUE "B. O." CONFESSION

"I EARN my living selling books," this woman writes,
a very fine set for children. Successful at first,
I found my sales dropping off I was discouraged ready
to qut I talked with my district manager. She gave
me some sales literature which, she said, would help me.

"When I sat down at home to study it, I found among the printed sheets a page torn from a magazine a Lifebuoy B O adsertisement Was this a delicate but? Had I become careless? Anyway, I decided to use Lifebuoy and play safe.

"I can see results already My sales are picking up. I am more prosperous and oh, so happy Keep up the good work of telling people it is never wise to take a chance with B. O' and that Lifebury can make their lives happier and more successful."

[/] No one is safe

We're so apt to think, "I couldn't offend." But we're wrong! Every normal person... husky day laborer, white collar worker, dainty debatants... perspires a quart daily, more in summer! Piez safe against "B. O," (seep sales). Bathe regularly with Lifebsoy.

Even in hardest water you get an abundance ich, pemetrating inther that desp-cleaness and pur-orus, stops "B. O." You can tell by its fresh, is nickly-vanishing seem that Lifetwey is different in

3 Make the simple tests described in the book - write down the results. Write 150 words or less about your

pressions of the range, washer or refrigerator. 5 Enter your test book and letter in the

competition for one of the free refrigerators, ranges and washers. If yours is one of the prize-winning letters, the Norge you have bought is yours without cost. Your down payment will be refunded.

This opportunity is open for a short time only. Doors delay. Terms are lower then ever prices may never again be so low. Visit the Norge detiler near you. Get the compless dentils of this offer. Act now.

The value of any test depends upon its completeness and upon who makes the test

No single test will prove the over all excellence of a refrigerator. To prove operating economy, it must be considered in relation to dependable performance To prove ice-making capacity, freezing time and current consumption must be taken into account. To prove adequate shelf capacity demands connderation of individual bome requirements. If there is any stagio factor more important to you than any other, It is the surplus power necessary to chill foods and freeze lot no matter how hot your kitchen may be.

Norge challenges comparison on esery point. Norge invites you to make the tests in your own home. Norge says, "If you do not find that Norge is everything we claim - will do everything we say it will --- we'll take it butk and refund your money."

(This sensational offer applies to Norge cauges and washers as wellas refrégerators.)

The tradition of Fthiorian independence extends back to the 11th century B which helps to explain why Emperor Haile Schools is taking such a resolute stand against the threatened invusion by Premier Mussolini's enthusiastic empire builders Though Piblopis like Greece has follon on hard days with much of its old time vigor spent in a long struggle for survival its decadence is visible only to foreigners. A Great Idea

Great Britain which has decided to reject David Lloyd George's recovery plan patterned after the \$4,000,000,000 work relief program of the Roosevelt administra tion has learned to distrust public works as an effective means of overcoming unem ployment It remains to be seen what judgment the United States will eventually form as the result of its own experiments infinitely preater than the most ambitious projects ever proposed by the British The outline of the judgment however is take ing form rapidly

It is significant that public works one the oldest schemes for treatment of unemployment never reclived unqualified approval by any of he numerous govern ments which have tried to make jobs for their citizens. The difficulty in every in stance has been the same The extra expenes has been too large to justify It is the most costly was to meet the demand for relief The United States is discovering another fault in public works also-the fact that a public works program is sion to take effect PK i never compared invorably with CNA as a relief agency. The new \$4,000,000,000 work relief program already has taken on CW t characteristics as the result of previous experience with that

anything but name. It was direct relief modified to harmonize with the American creed that may should live by the sweat of his brow even though the sweating be induced by unremunerative and sometimes masteful effort. The CWA concept in brief le a compromise between public works which are too costly and direct relief which is believed to be demoralizing it is a distinctively American way of gelling around the fact that public works is a great idea which isn't practical and the fact that direct relief is a poor idea which

Under a Handicap

Probably no one regrets more seenly the brass knuckle defense tactics used against the utility holding company till more than the utilities wh recupulously slutsined from such tractics. They knew their method of opposition would be scrutinized by the apposition it is virtually impossible for them to make their critics nears of the fact that one black sheep in a flock does not mean all the rest are black

They are under a serious handicap in defending their interests against the Poose-velt administrations attack. When they at tempt to reply to a broadside the effect of their argument is ruined at the outset by the politicians warning cry of Power trust. Their investors automatically be come privilege spekers when they attempt to defend their securities. Their friends are heartless perseculors who put property before human rights. In such rircumstances facts are a poor match for emotionalism

Disclosures of faked telegrams in the fight on the holding company bill are dam nging It is regrettable that a fight which could have been won fairly was spolled by repetition of tactics which have made enmiss for the electric power industry in the past. The quickness with which all utill ties have been condemned for the misde meanor of one organization proces what a powerful weapon prejudice can become in the hands of government—a weapon so powerful that defense of private rights at most can be made to appear an offense against the sinte It was not after all the spurious telegrams urging congressmen to vote against the holding company bill which made the administration apers but the bona fide protests which caused the bill to be defeated in the house of representatives

The New Lessure

One of the very first problems to bob up under the More Abundant Life plan of government was the New Leisure Problems scared no one in the earlier days of the new leal however and the New Lelsure was surrounded immediately by a legion of experts

They mapped out a solution with no trouble and if the solution now can be recalled only vaguely that isn't a reflection on the solution but on the problem Something has happened to it Apparently the problem couldn't compete for Altention with the others which came crowding in

on the new deal from all directions The New Leisure was the extra time during walting hours that wage earners were going to have to fill with worthwhile pursuits when notional planning and equil able distribution of work had been put into effect A whole new field of oppor lunity for acciologists was thrown open for

grazing They sensed outckly that ware excuere and the families of wage earners were going to have to learn how to play how to imof sulschief in the dezens of hours that would be left each week after 40 hours of toll and hedd hours of sleep It was a challenge to their ingenuity

They did a fire leb The trouble is the problem didn't materialize according to extectation. Wage entriers who had lobs assistance Men who didn't have lobsthe total failed to virid to efforts to reduce It had more lelsure time than they could In fact from this distance the New Yell sure arenus n fair availed of the national sittlude at the beginning of the new deal Nothing was impossible this not even Imprebable

Contequently he was the first to wince when one of the bitteres of opposition writers published an old Taft veto message in it. Mr. Taft belabored congress for satisfying public whims by possing unconstitutional laws. It was apparently a pertinent point and struck deep Other writers picked it up in good faith without investigating it and spread it broadens!

The President considered it we serious a blow that he looked into the matter personally. If a discovered that Mr. Faft had sent such a veto message to congress but the congress and passed the law over the veto and the supreme court actually upheld its constitutionalit. In other words the new deal an argonist had left out the most important brif of the story which was that Mr. Iaft was wrong Reference Note.

The veto concerned the Webb-Kenyon set which was velowed by Mr. Taft. Feb. 28. 1913. congress passed it over the yeto the same day roustlintonality was uphely by the Supreme court in a said brought by the Circk Distilling Co. In 1916 the decision was a Pevanter dissenting.

The provi ion that deposit insti-tutions would be permitted to orig-inate issues was especially resent-ed. The hanks would have had a bg edge on competitors in the field because of their inside track with corporate depositors. So the investment houses declared a pri-tate but vigorous vendetta on the

Bitter

In the opposite corner were the big commercial bank chiefs. Their tongues were hanging out at the prospect of enlarged earnings and they didn't think it a bit nice of the security dealing brethen to sago a freeze out.
